RÉSUMÉ

Career objective:

To build a strong and successful career as a web developer by creating smart, easy-to-use websites and web applications. I enjoy using modern tools and technologies to solve real problems and make things better for users. I'm always looking to learn new skills and improve my work. My goal is to be part of a team where I can grow, share ideas, and help build great projects that make a difference.

Educational details :

Bachelor of computer application

2023-2026

Dezyne École college, Ajmer

MDSU, Ajmer

8.0 CGPA (Till 4th semester)

Senior secondary school, 10+2, Commerce IP

2022-2023

M.S.S Public School, Kishangarh

CBSE

Percentage : 63%

Secondary school ,10, All subjects

2020-2021

M.S.S Public School, Kishangarh

CBSE

Percentage : 57%

Projects:

Fire Fighting Robot using Arduino UNO

- Built an autonomous robot that detects and puts out small fires using sensors and a water pump.
- Used Arduino UNO to make the robot detect flames, move to the fire, and spray water to put it out.
- This project helped me learn more about working with sensors, controlling devices, and building basic robots.

Website making in 2024

- Built a responsive website to showcase FireFito Robot, a fire-fighting robot made with Arduino.
- Designed the user interface using HTML and CSS, with a clean and professional look. Included project info, key features, and images to show how it works.

Spotify Clone

- A clean, modern layout that adapts to all screen sizes, featuring a sidebar for navigation, a main section for playlists and albums.
- Stylish design using CSS for gradients, hover effects, and transitions to mimic Spotify's sleek UI and interactive feel.

[GitHub Repository](#)

● **Smart Campus Management & Automated RFID Attendance System**

Developed a full-stack campus management platform with role-based authentication, student/course management, attendance analytics and automated RFID attendance using Arduino Uno. Integrated hardware with a Python/Java backend and MySQL database, providing real-time attendance tracking and administrative reporting.

● **AI-Powered Resume Analyzer & Job Matching Platform**

Developed an NLP-based web application that analyzes resumes against job descriptions, extracts technical skills, calculates job-match scores and identifies missing skills. Implemented resume parsing, keyword analysis, personalized recommendations, user authentication and a database-backed dashboard using Python, Flask/FastAPI, JavaScript and MySQL.

● **Extra curricular activities:**

- Participated in kaleidoscope – 2023 -2024
- Participated in College Identity Exhibition - 2024

● **Hobbies**

- Listening Music
- Cricket

I hereby declare that all the above information is true and to best of my knowledge.
